# Laminated Boards

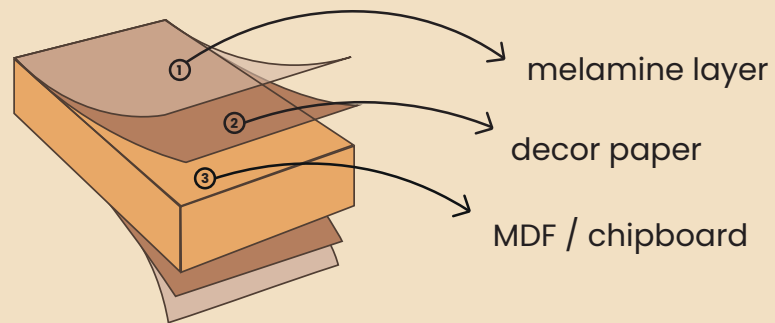

## Redefining Wood with Formite's Laminated Perfection

Formite® Low Pressure Laminates are the versatile and cost-effective solution for enhancing furniture, interior spaces, and projects in residential and commercial settings. Our laminated boards fuse décor of captivating designs and patterns onto MDF or Chipboard, delivering a sophisticated and durable surface. Manufactured with a low pressure press, our laminates ensure superior quality and precision.

Prioritizing your well-being, Formite® uses E2 and E1 grade boards, meeting high health and quality standards. Trust in the consistent quality and performance of our laminated MDF and Chipboards. Create stunning interior spaces that leave a lasting impression with Formite® Low Pressure Laminates.

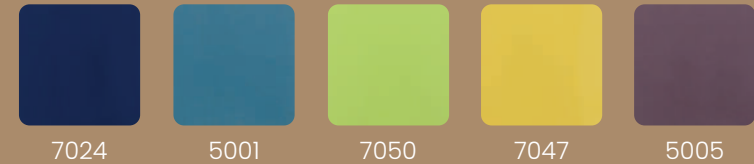

**Laminated MDF:** Formite® laminated MDF is a modified wood product manufactured by breaking hardwood or softwood residues into wood fibers. These fibers are combined with waxes and resin binders in defibrillators, and then subjected to heat and pressure to form panels which is then beautified with lamination of décor paper. Formite® MDF offers several design overlays that are applied to the finished product and it is delamination free. Laminated MDF offers a solid and durable surface, making it suitable for a wide range of applications in residential and commercial settings.

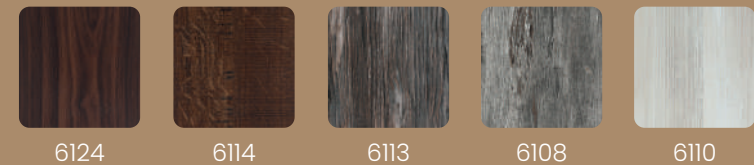

**Laminated Chipboards:** Formite® laminated chipboards are composed of compressed wood particles or chips, typically derived from wood or recycled wood fibers. Through a process of heat and pressure, these wood particles are bonded together with resin or glue, resulting in a robust and stable panel which is then beautified with lamination of décor paper. Formite® offers several design overlays in chipboard that are applied to the finished product and it is delamination free. Laminated chipboards provide a cost-effective solution for surfacing materials without compromising durability.

Formite® Low Pressure Laminates offer a wide selection of colors, designs, surface textures, and thicknesses, providing versatile options for your interior projects. Whether you prefer a sleek matte finish or a glossy shine, our laminates deliver exceptional quality and aesthetic appeal.
