COMPACT LAMINATES

General Grade

Formite® General Grade Compact Laminate - Melamite for Unparalleled Performance

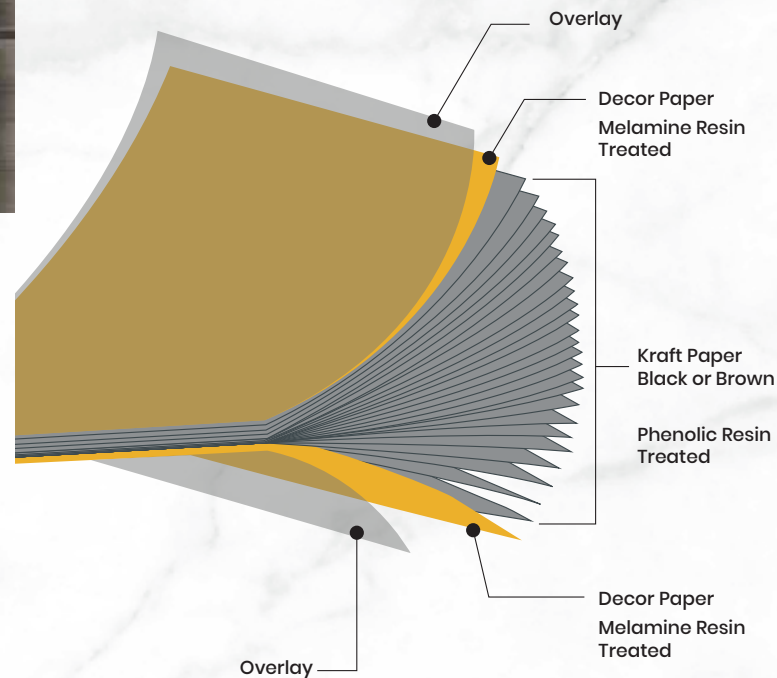

General Grade Melamite:

Formite® General Grade Melamite is a compact laminate which offers a balance of style & performance, making it suitable for various projects. It is known for its durability, impact resistance, moisture resistance, and electric resistance. The layers of kraft paper impregnated with phenolic resin and the high-pressure manufacturing process result in a solid, dense material that can withstand heavy use and wear.

Due to its excellent properties, general grade compact laminate finds applications in both residential and commercial settings. It can be used for interior surfaces such as partitions, wall panels, vanity furniture, cabinets and countertops which are commonly installed in high-traffic areas such as schools, hospitals, restaurants, retail spaces, and public facilities.

Formite® Compact Laminate - Melamite is engineered for durability and exceptional resistance. Its robust engineering and advanced materials make it ideal for high-impact environments. Withstanding heavy use and frequent impact, Melamite ensures long-lasting performance.

Formite® Melamite boasts a comprehensive selection of colors, designs, and surface textures, catering to a wide array of technical and design requirements. With a meticulous focus on detail, we offer a range of options that are both visually captivating and technically superior.
